

Iodine Based

ACTI-Gard®

Antimicrobial Incise Drapes

The Next Generation!

ACTI-Gard® is revolutionary, with features only MCD can offer

Performance Through Technology

- FDA cleared, 510(k) No. K000442
- The stable antimicrobial agent in ACTI-Gard® ...
 - allows both bulk non-sterile and single packaging
 - remains effective following ethylene oxide or gamma sterilization
 - has low water solubility for extended effectiveness during wet procedures.

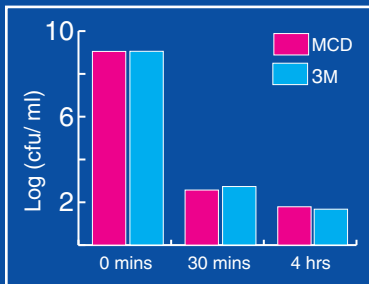

Safety

- ACTI-Gard® Antimicrobial Incise Drapes were “repeat patch tested” in humans and found to be safe for the intended use
- Additional animal studies observed no tissue or ocular irritation, sensitization, or toxicity.

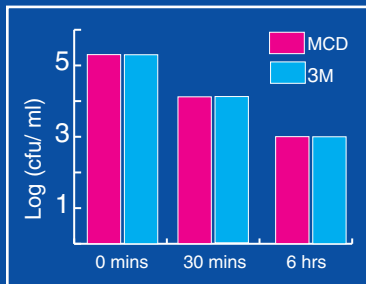

Effectiveness

- The antimicrobial agent in ACTI-Gard® was evaluated in laboratory studies and found to be safe and effective in reducing the levels of both laboratory stock and clinical isolates of organisms commonly associated with post-operative infection.

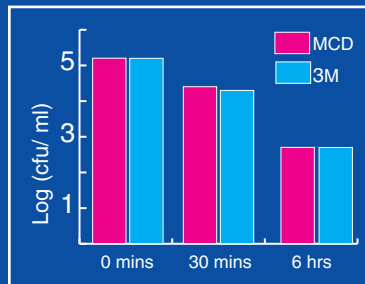

* Escherichia coli

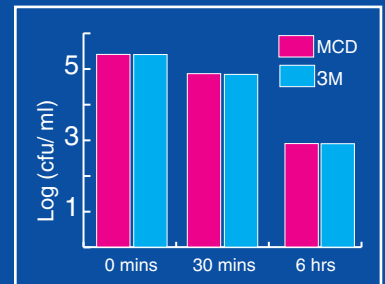

° Staphylococcus aureus

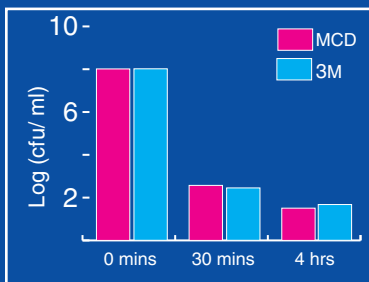

° Staphylococcus epidermidis

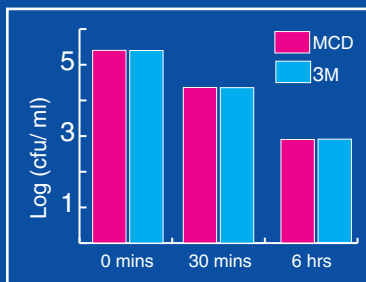

° Escherichia coli

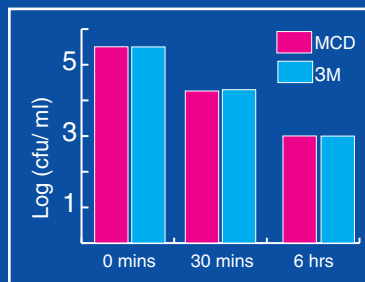

* Bacillus subtilis

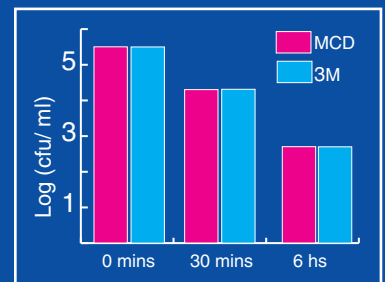

° Streptococcus pyogenes

° Candida parapsilosis

° Enterococcus faecium

* Organisms seeded on human skin

° Organisms seeded on live pigskin
